

CHL DATA CENTER SUPPORT COST GUIDE

The CHL Data Center plays a vital role in research activities with the US-affiliated Pacific region. We provide services that include review of data requests, consultation on developing new and sound methods for designing and analyzing studies in basic, translational, community and clinical trial research, and assisting with analyses for grant development or manuscript preparation. All investigators are welcome to utilize CHL data and services. For sustainability of our data center, not-for-profit fees are applied for these services.

TYPES OF CHL SERVICE	RATE
DATA ANALYSIS SUPPORT	
Support for data analysis such as identification of appropriate statistical analysis methodology; implementation of statistical analysis; advice on and support for statistical programming.	\$125 per hour
IT SUPPORT & RESEARCH	
Any technical support outside the research request.	\$125 per hour
CONSULTATION/ ADMINISTRATION	
Expert advice on CHL data, support on how to make a research request, or interest in study support, data analytic support, research planning, manuscript writing, or other types of services. Additional expert advice needed on CHL data to make a research request or interest in study or analytic support, research planning, and manuscript writing. Development, review, and consultation on sample size determination; optimal study design; randomization schemes; plans for data management, integration, and analysis. Approved requests that require additional data or changes to research questions/study design.	\$125 per hour
RESEARCH REQUESTS	
Requesting analytic or qualitative CHL datasets for research study, abstracts, manuscripts, or presentations.	\$1,000 per request
PACTRAC LICENSE	
A license to access PacTrac and register a study that includes multiple participants.	\$200 per year
